Basics of the ISO Process Abbreviations Used Proposal Project idea presented to ISO Submitted Ballot to the appropriate Technical Committee (TC) /Subcommittee (SC) to approve New Work **NWIP** Item Proposal (NWIP) Working Group (WG) is assigned to develop the **WG** Assigned draft standard. A Working Draft (WD) is submitted for ballot and **WD** comment. Comments received during WD ballot are incorpo-CD rated into Committee Draft (CD) Ballot is presented to approve the CD. Comments received during CD ballot are incorporated into the Draft International Standard (DIS). DIS Ballot is presented to approve the DIS. This is the final opportunity to offer technical comments on the draft. Ballot of the Final Draft International Standard (FDIS) **FDIS** is to finalize the standard for publication. Only editorial comments are received at this point. Publication of new ISO standard follows.

Simplified ISO Process

A standard may take 2-3 years for development.

NOTE Due to the complex nature of the process, there are avenues where the WD and CD stages may be skipped. Consensus by all Participating (P) bodies involved is the goal. Each step provides opportunity for comment and correction from members of the international community.

Your responsibility:

1. At each stage, review the draft for content, clarity of direction and editorial accuracy.

All comments **MUST** be placed in the provided comment template. This allows easy collation and signifies to the lead duplication of comments.

2. Vote as you feel appropriate and upload all comments and recommendations made on the comment template by the dead-line.

The US may only present 1 vote to ISO for each ballot, Approve, Disapprove or Abstain. The TAG Chair reviews all comments and votes and verifies the US position based on the votes and comments presented by members. This is sent to ANSI, the US representative to ISO. All relevant comments submitted via the comment template are forwarded with the US position.
