

3. You will only have access to those committees that you are listed on. Click on your committee name.

## ASABE Forums

Your Name

Forums for your committees will be listed here. Select the committee you wish to work with. Selecting the Ballot button next to the committee name will take you directly to the open committee ballots.

A red **Ballots** button indicates that your committee has a ballot that you have not yet registered a vote on. The **Ballots** button will turn green when you have submitted your vote. You may access the ballot to update your comments or change your vote as long as the button is visible. The button will disappear when the ballot closes.

b. To access ballots or documents, refer to the menu at the top right of the list of notices. Or select the red

The screenshot shows the ASABE website header with the logo and navigation menu. Below the header, the breadcrumb trail reads 'Home > Forums'. The main heading is 'ASABE Forums'. Underneath, there is a sub-menu: 'asabe-pafs-03 / ballots'. Below this, it says 'Member' and 'PAFS-03 Plant, Animal, & Facilities Systems Standards Oversight'. On the right side, there is a menu with four items: 'messages', 'ballots', 'library', and 'members'. The 'ballots' item is highlighted with a red underline.

c. Selecting Library from the menu will allow you to access reference and shared information for the committee.

This screenshot is identical to the previous one, but the 'library' item in the right-hand menu is highlighted with a red underline instead of 'ballots'.

d. Select "ballots" to see available ballots for review. A red ballot shows an open ballot for you to access.

The screenshot shows a list of ballots under the heading 'MS-23/19/1 Electronics for Mobile Equipment (ISOBUS)'. At the top right, there is a menu with 'messages', 'ballots', 'library', 'members', and 'admin'. The 'ballots' item is highlighted in red. Below the menu is a table with three columns: 'Open/Available Ballots', 'Notes', and 'Close Date'. The first row contains a ballot title: 'ISO/DIS 15003 Agricultural engineering - Electrical and electronic equipment - Testing resistance to environmental conditions'. To the right of the title is a red box that says 'Not Answered'. A red arrow points to the title. Below the title, there is a red text instruction: 'Click on the title of the ballot to open it.' The second row contains another ballot title: 'ISO/DIS 11783-9. Tractors and machinery for agriculture and forestry - Serial control and communications data network - Part 9: Tractor ECU'. It also has a 'Not Answered' status. The 'Notes' column contains instructions for commenting on the ballots. The 'Close Date' column shows dates like '2019-01-07' and '2019-01-28'.

Open/Available Ballots	Notes	Close Date
<a href="#">ISO/DIS 15003 Agricultural engineering - Electrical and electronic equipment - Testing resistance to environmental conditions</a> <span style="float: right; border: 1px solid red; padding: 2px;">Not Answered</span> <p style="text-align: center; color: red; font-weight: bold;">Click on the title of the ballot to open it.</p>	<p>Please use the comment box below only for general comments to the committee. Any official comments to be sent along with the US position to ISO must be attached using the Comment Template - instructions located within the ballot.</p> <p>Note: This is the final opportunity to provide technical comments on this draft.</p>	2019-01-07
<a href="#">ISO/DIS 11783-9. Tractors and machinery for agriculture and forestry - Serial control and communications data network - Part 9: Tractor ECU</a> <span style="float: right; border: 1px solid red; padding: 2px;">Not Answered</span>	<p>Please use the comment box for general comments to the committee. Any official comments to be sent along with the US position to ISO must be documented on the Comment Template provided.</p>	2019-01-28

e. Review the ballot question and attachments. Follow the directions on the ballot.

As a member of the PAFS Community PAFS-03 Standards Committee, please review the PAFS-20 SDC report for X433.1. Verify that due process has been followed in the development of this standard in accordance with Section 9.1.3 of the Standardization Procedures. NO TECHNICAL COMMENTS WILL BE ACCEPTED FOR INCLUSION AT THIS POINT IN THE APPROVAL PROCESS.

Do you approve PAFS Community approval of the project X433.1, Loads Exerted by Free-Flowing Grain on Bins?
